

UNITED STATES DISTRICT COURT
DISTRICT OF OREGON

IN RE: MASK AND ENTRY
REQUIREMENTS IN RESPONSE
TO COVID-19

Standing Order 2022-2

The following persons shall not enter any United States Courthouse in the District of Oregon:

- i. Persons currently diagnosed with or experiencing any symptoms of COVID-19;
- ii. Persons who are not fully vaccinated¹ against COVID-19 and who have had close physical contact within the last 14 days with a person who has been diagnosed with COVID-19; and
- iii. Persons who have been asked to self-isolate or self-quarantine by a medical professional or public health authority and whose isolation or quarantine period has not concluded.

All persons seeking entry to, or occupying, a public lobby or elevator space in any United States Courthouse in the District of Oregon must wear a face covering or mask unless a medical condition prevents them from doing so and they can show proof of the medical condition in the form of a physician's order or other documentation. The face covering or mask must completely conceal the wearer's nose and mouth at all times. Any visitor seeking entry to the Courthouses without a mask or face covering will be provided one by the Court. If the Court is unable to provide a mask for any reason, the visitor will be asked to contact by telephone the office to be visited to explore alternatives to entering the Courthouse. With respect to courtrooms and adjacent spaces, a judge may determine whether to require vaccinated individuals to wear a mask.

The United States Marshal, his deputies, and the Court Security Officers shall enforce this Order and deny entry to anyone attempting to enter in violation of this Order.

IT IS SO ORDERED. DATED this 14th day of March, 2022.

MARCO HERNÁNDEZ
CHIEF U.S. DISTRICT JUDGE

¹ The Court adopts the definition of "fully vaccinated" set forth by the Centers for Disease Control as of the date of this Order. According to that definition, a person is considered fully vaccinated:

- two weeks after their second dose in a two-dose series, such as the Pfizer or Moderna vaccines, or
- two weeks after a single-dose vaccine, such as Johnson & Johnson's Janssen vaccine.
